GrimeStopper Weather Shield

* Cylinder Sold Separately.

GS M/R

GS LDB

The "GRIMESTOPPER" is a durable "WEATHER SHIELD" designed for use with a wide variety of cylinder applications. This "Lock Protector" will guard cylinders against environmental hazards by preventing moisture and dirt from entering the key way.

The "Grimestopper Weather Shield" body is made of a rust proof metal alloy. This premium cylinder cover utilizes a dowel hinge pin and backing plate constructed of high grade stainless steel.

Follow the instructions on the maintenance label that is included with all Grimestopper products to help maintain surface integrity.

The revolutionary contours of the lid cam deliver a constant closing pressure for a better protective seal. The flat spring design means "NO COIL SPRING TO BREAK" and makes the "Grimestopper Weather Shield" a durable, long lasting and low maintenance addition to any locking system.

A tab extension at the bottom of the cover allows for effortless Single Hand Operation. Recessed mounting holes in the base and self-drilling screws make installation onto any surface quick and easy.

- Height: 6.3 cm (2.5")
- Width: 5.0 cm (1.9")
- Base Depth: 1.4cm (0.55")
- Base and Cover Depth: 2cm (0.79")
